STK4042XI

AF Power Amplifier (Split Power Supply)
(80W min, THD = 0.008%)

Features

- Small-sized package permitting audio sets to be made slimmer.
- The STK4018XI series are available for output 50W to 80W and are pin-compatible.
- Facilitates thermal design of slim stereo sets.
- The use of a current mirror circuit, cascode circuit, pure complementary circuit provides low distortion (0.008% / 100kHz, LPF ON).
- Possible to design electronic supplementary circuits (pop noise muting at the time of power ON/OFF, load short protector, thermal shutdown)

Notes. For power supply at the time of test, use a constant-voltage power supply unless otherwise specified.

*1 For measurement of the available time for load short-circuit and output noise voltage, use the specified transformer power supply shown below.

*2 The output noise voltage is represented by the peak value on the rms scale (VTVM) of average value indicating type. The noise voltage waveform includes no flicker noise.
